

NATHAN ANTHONY®

MADE IN CALIFORNIA

CUSHION AND PILLOW FILLS GUIDE

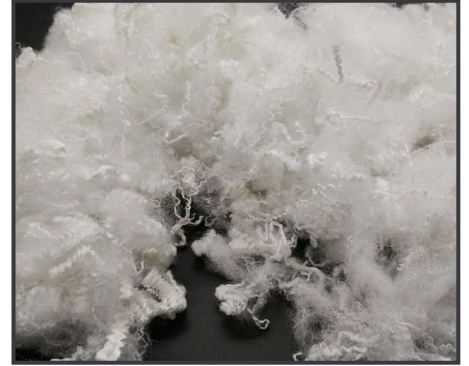

FIBER FILL

Cushions are made of 100% Dacron fiber fill. There is no foam in our back cushions with a small exception to some designs.

DOWN

A down cushion is made up of duck down and feathers in a special combination. There is no foam in our back cushions with a small exception to some designs.

TRILLIUM

Trillium cushions are made of man-made polyester fibers that mimic the feeling of down. The fibers are denser and heavier and work in unison giving them great elasticity. There is no foam in our back cushions with a small exception to some designs.

NA COMFORT FILL

NA Comfort fill is a unique, proprietary blend of down, feather and fibers specially formulated by our design team to mimic the feel of down while maintaining the crisp clean look of Nathan Anthony's original designs.
